

# Don't nickel and dime when it comes to survival

Established over 18 years ago, Performance Flotation Developments (Australia) Pty Ltd manufactures the ULTRA, Australasia's leading range of PFDs

The safest PFD you can buy is the one you will want to wear, and with over 40 years of collective design and manufacturing experience in the team behind the ULTRA range, you can't go past a safer or more comfortable product.

The current ULTRA range offers exceptional performance in terms of comfort, safety and durability.

ULTRA's research and development team are constantly testing new designs and features to bring you the best product for your sport.

At the pinnacle of this research is the new Gamefish. This versatile PFD is perfect for fishing and boating. Light and comfortable with plenty of ventilation to keep you cool when landing those big ones! It is a manually inflated PFD and has plenty of secure pockets for phone, GPS and iPod.

The 150 Newtons of buoyancy makes it ideal for use offshore. With the easy fit and comfort level, you won't even know you are wearing a PFD, which makes it a great choice for rock fishermen.

This exceptional PFD has five-tick mark certification, the premier mark for design, quality and performance.

As with any safety product, the instructions for use and care should be read and fully understood before use.

It is vital your PFD fits well and is comfortable. Too many PFDs today are manufactured with little consideration for wearer comfort. All ULTRA PFDs are designed for comfort and flexibility. The Gamefish is no exception, designed for hours of continuous use with a full mesh lining and integrated venting as standard features.
